### One-vehicle accident claims life of former Hoopeston man

A former Hoopeston man died Saturday morning of injuries sustained in a one-vehicle accident.

Joseph Watson, 25, of Potomac, was pronounced dead at 2:59 a.m. Saturday in the Hoopeston Community Memorial Hospital emergency room, said Vermilion County Coroner Peggy Johnson.

Mr. Watson died of injuries he received

after his vehicle hit a tree at Rt. 1 and Lover's Lane Rd.

According to the Vermilion County Sheriff's Department, deputies were called to the scene at 1:39 a.m. Further details were unavailable from the sheriff's department at press time.

An inquest will be held at a later date, Johnson said.

### Health officials cancel flu clinics in wake of vaccine shortage

With last week's announcement that British health officials have halted Chiron Corporation flu vaccine shipments to the United States, local health officials are alerting Vermilion County residents that flu vaccine is not expected to be available this year.

"As of today, we have cancelled all flu clinics we had scheduled in Vermilion County," said Vermilion County Health Department Community Health Director Lynn Galloway. "At this point, any flu vaccine that we may locate will go to our most at risk people."

The Illinois Department of Public Health identifies those at risk for flu complications to include people over age 65, children 6 months to 23 months, people aged 2 years to 64 years, with underlying health conditions, long term care individuals, health care workers, children on aspirin therapy, and caregivers.

Galloway advises Vermilion County residents to check with their healthcare providers for vaccine availability, or to check the health department's website for new information. "But the reality is," Galloway said, "this will be a difficult year in which our residents will have to rely on good, old fashioned preventive medicine." As the flu season

approaches, public health officials reminds people to use greater care in washing their hands frequently and correctly. Galloway urged parents to take the time to teach their children to correctly wash their hands often to reduce the spread of germs. In addition, people are urged to keep alcohol-based hand cleaner for a backup if hot water and soap are not available.

Other tips to stop the spread of the flu virus include:

- cover your mouth when you cough, but not with your bare hand;
- clean and disinfect surfaces at home and work;
- avoid contact with people who are sick;
- do not go to work or school if you are sick;
- avoid visiting hospitals and nursing homes if you do not feel well;
- if you feel sick, call your doctor.

Symptoms of flu include fever, headache, tiredness (extreme), dry cough, sore throat, nasal congestion, body aches.

The Vermilion County Health Department will have pneumonia vaccine available by appointment only. Call 431-2662 for information, or to make an appoint-
