Vermilion County Health Department sets evening cholesterol screenings for Heart Month

February is American Heart Month, and heart disease remains the leading cause of death across the country, according to the Centers for Disease Control and Prevention. According to the CDC, about every 25 seconds, an American will have a coronary event; and every minute, one person will die from a coronary event. In 2005, almost one half million women died of heart disease.

The chance of developing coronary heart disease can be reduced by taking steps to prevent and control the factors that put people at greater risk including monitoring cholesterol levels, according to the CDC. The Vermilion County Health Department is offering special evening cholesterol checks in February and March to help people who may not be able to make daytime appointments: Thursday, February 26th from 4 pm to 7 pm, and Thursday, March 26th from 4 pm to 7 pm.

The special clinics are designed to help working people find a more convenient time to get their cholesterol checked. "We are trying to create more opportunities for busy people to be able to access this simple test which could identify potential health problems," says Community Health Services Director Jenny Trimmell. Morning cholesterol checks are also scheduled at the health department on the 4th Wednesday of every month from 8 am to 11 am. The CDC says all adults over the age of 20
