The field day will take place from 9-11 a.m. and will provide an opportunity to learn about using cover crops in local cropping sequences.

Specifically, this year's plot will be a Nitrogen focused plot. The species and mixes planted in the plot were chosen to show different capabilities for quick growth, nitrogen capturing abilities, as well as nitrogen producing benefits.

Come hear from producers well-versed in adapting cover crops into local cropping systems and soil types!

The demonstration plot and field day were made possible by a grant from the Illinois Department of Agriculture-Cover Crop Initiative and seed donated by ProHarvest Seeds, Inc.
